BIOMASS CONFERENCE AND STUDY TOUR

at the Centre for Alternative Technology

14th & 15th May 2007

The Centre for Alternative Technology in association with MSc Architecture: Advanced Environmental and Energy Studies (University of East London) is hosting this conference, which aims to provide information on the rapidly expanding area of biomass energy and its importance as a viable renewable energy resource. It will explore the benefits of biomass energy ranging from: climate change, energy production, carbon dioxide emissions, fuel crops and waste reduction. Leading researchers and experts from the UK and Europe will be presenting their work, with a discussion forum at each session.

Presentations include; Biomass resources in the UK and Europe, The processing of biomass from forest / field to consumer, biomass crops, Combined Heat and Power, developing small

and medium scale wood fuel supply chains and current funding support for biomass related projects.

Speakers Include: Dr John Valentine (Grasslands Research Institute), Marcus Huhtinen (North Karelia Institute of Applied Science), Mike Pitcher (Wood Energy Business), Fiona McPhie (Northern Woodheat), Duncan Kerridge (Dulas Engineering Ltd.)

Conference Venue: Centre for Alternative Technology, Machynlleth, Wales, on 14th May 2007, with an optional study tour of biomass energy sites on 15th May 2007.
